Conrad Shawcross: the Dappled Light of the Sun

By Conrad Shawcross, Patrick Sykes

Royal Academy of Arts. Paperback. Book Condition: new. BRAND NEW, Conrad Shawcross: the Dappled Light of the Sun, Conrad Shawcross, Patrick Sykes, The sculptures of Conrad Shawcross ra explore subjects that lie on the borders of geometry and philosophy, physics and metaphysics. For the 2015 Summer Exhibitions Annenberg Courtyard installation Shawcross created a large-scale, immersive work consisting of five cloud-like forms in steel. Made from thousands of tetrahedrons these stand at over six metres high and weigh five tonnes each. Shawcross explains: The Greeks considered the tetrahedron to represent the very essence of matter. In this huge work I have taken this form as my brick, growing these chaotic, diverging forms that will float above the heads of visitors. As well as photography of the works in situ, the publication contains working drawings, structural diagrams and a text by the architecture writer Patrick Sykes.

Reviews

This book is definitely not simple to begin on studying but quite fun to see. I actually have read and that i am sure that i will gonna read through yet again once again in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Brennan Koelpin**

Comprehensive guide! Its this type of very good read through. It is actually writter in simple words and phrases rather than difficult to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.
