

The Relation of the Health of the Host and Other Factors to Infection of *Apium Graveoleus* by *Septoria Apii*: Submitted in Partial Fulfillment of the Requirements for the Degree of Doctor of Philosophy

Filesize: 2.45 MB

Reviews

*This composed ebook is wonderful. It really is written in basic words rather than hard to understand.
You may like the way the writer composed this pdf.

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Relation of the Health of the Host and Other Factors to Infection of Apium Graveoleus by Septoria Apii: Submitted in Partial Fulfillment of the Requirements for the Degree of Doctor of Philosophy in the Faculty of Pure Science, Columbia University Students of immunity and susceptibility have been slow to recognize any fundamental distinctions in the relations of host and parasite in the great group of organisms which cause disease in plants and animals and yet the concepts of saprophyte, semi-saprophyte, and obligate parasite have been current at least since the time of Debary. Under the influence perhaps chiefly of Ehrlich s side chain theory of immunity, degrees of resistance have been regarded on the one hand as inversely parallel to the virulence of the attacking organism and on the other hand as directly parallel to the vigor of the host. In plant pathology this view has been particularly prominent in the literature of the facultative parasites. With the development of the science of immunity, the animal pathologist has gone so far as to regard the interactions of host and parasite as specific in each case. It is becoming increasingly apparent that the specificity in the relation of plant pathogens with their hosts must be reckoned with. The saprophytic fungus may be able to live on dead tissue from a wide range of plants, sometimes showing little preference for any one of them. The semisaprophyte may or may not be more limited in its food range on dead material and attacks from one to a considerable number of living plants with varying degrees of virulence and with variable results to the hosts.
