PSYCHOLOGICAL ASPECTS OF WOMEN'S HEALTH CARE: THE INTERFACE BETWEEN PSYCHIATRY AND OBSTETRICS AND GYNECOLOGY (2ND REVISED EDITION)

American Psychiatric Publishing. Paperback. Book Condition: new. BRAND NEW, Psychological Aspects of Women's Health Care: The Interface Between Psychiatry and Obstetrics and Gynecology (2nd Revised edition), Nada Logan Stotland, Donna E. Stewart, In the decade since the first edition of this work was published, an incredible array of reproductive technologies and associated issues has emerged. Obstetricians and gynecologists are hard-pressed to deal with the startling breadth and depth of these issues, which require mastery over a daunting combination of ever-increasing scientific knowledge, technical skills, long hours, legal liability, and exposure to clinical situations of overwhelming emotional intensity. Psychiatrists have a vital role to play in helping obstetricians and gynecologists cope with a host of problems whose resolutions require not just technical skill, but also knowledge of biology, psychology, sociology, anthropology, ethics, and law. For example, to design and implement strategies to reduce the transmission of HIV, psychiatrists could work with public health workers to incorporate the psychology, sociology, and anthropology of female reproductive behavior. Psychiatrists could likewise improve the diagnosis and treatment of breast and pelvic malignancies by elucidating the factors that deter women from self-examination and regular medical screening and enhance treatment compliance. Divided into three sections, this clinical and theoretical sourcebook addresses every major area of contemporary concern. * Pregnancy covers topics from the psychology of normal gestation to physical and psychiatric complications during and after pregnancy, including new prenatal diagnostic techniques and the dynamic issues that emerge when abnormalities are detected, and the use of psychotropic drugs and electroconvulsive therapy in pregnant and lactating patients.* Gynecology discusses not only common gynecologic problems but also more controversial issues such as induced abortion and the new reproductive technologies, including the role of the menstrual cycle in exacerbating and precipitating psychologic symptoms, the psychiatric aspects of menopause, the assessment and...
