Rather it is a series of occurrences resulting in a failure or success. In the immortal words of Pogo: We have met the enemy and he is us. This book is historic and here's why: The model created by Albert Einstein is absolutely logically correct. However, the information technology industry has taught us through systems engineering that something can be logically correct and physically wrong. Not wrong as much as different. That's when we realize that logically correct experiments, conducted in logically correct manners, immersed in logically correct models (thinking), produce logically correct (expected) results and all of that has absolutely nothing necessarily to do with whether or not that effort represents physical reality. There is another way to think. No 1, empowers us to leverage a new tool called Translation Tables to completely encapsulate various models of the universe, including Einstein's original model (M2) and the modern incarnation of it (M1). We then have the ability through this net new tool to compare and contrast different models, including The Emergence Model (M5). Only one model eliminates cosmological incongruity. Only one model unifies physics. Only one model demonstrates the threads connecting quantum mechanics to cosmology. Only one model is simultaneously logically correct with what it is we think we know and at the same time with other models of the Universe. Only one model fits the entirety of evidence collected. That model is M5: The Emergence Model. The latest CERN dimensional experiments are easily accommodated as are the latest...
