A text-book of general physics for the use of colleges and scientific schools

By Charles Sheldon Hastings

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 178 pages. Dimensions: 9.7in. x 7.4in. x 0.4in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1900 Excerpt: . . . its atomic mass divided by its valence in the compound electrolyzed. Thus, let q stand for the quantity of electricity which passes any point of the circuit, m the total mass liberated, A the atomic mass of the ion, and V its valence. Then (4) $m = kq$, where k is a constant depending only on the units employed. If t denote the time of flow of the steady current t , equation 4 may be written kA . (5) $m = zte$, kA by writing e . e is called the electro-chemical equivalent. It is found by experiment that one ampere, flowing for one second, deposits 0.001118 gm. of silver. Taking the atomic mass of silver as 108, that is, 0.16, the value of k is found to be 1.035(10), from which the electro-chemical equivalents of the other elements may be calculated. Thus, by equation...
